

## Parents feedback

Croft Community School is very keen to hear parent's views on the school and how we can improve. As part of attempting to achieve the LPPA award we would very much like continue having that dialogue.

Of the survey conducted in January/February we had 27 surveys returned from 152.

On the whole the results were very positive and these results can be found on the school website under the parents tab.

I've also selected some of the comments from the survey as well which can be found under the same tab.

We also held a meeting with parents and carers on 6<sup>th</sup> February so that we could describe the events that were taking place in school, again we have taken these ideas on board and have completed a "You Said, We Did" document just that everyone is aware of some of the things that go on in school.

Facebook page to be updated more regularly. Text and Facebook message to be sent out every Friday with potential changes that week.

Poor communication between home and school. Support to parents to help prepare pupils for change in the forthcoming week would help. More information on the Facebook page.

We are going to run a series of workshops and demonstrations for parents to come along too during the school day. These will be:

- Internet safety
- TEACCH
- Mental Health First Aid
- Behaviour strategies
- Mindfulness
- Listening Matters
- Bowen Therapy
- Lego Therapy
- Yoga
- ASC strategies

Unsure about the therapies and personal development programmes that are used with the pupils.
